Subject: Hurricane Maria Update

Dear Valued Baxter Customer,

We're writing to provide additional information intended to assist you make important decisions involving the treatment of your patients.

We are continuing our recovery from the impact to our Caribbean manufacturing and distribution facilities and are doing everything possible to ensure a consistent supply of product for the patients you serve.

To mitigate any supply disruption of Baxter's MINIBAG PLUS products, customers are increasingly choosing Baxter's line of frozen pre-mixed drugs. To help sustain the supply of these critical products, Baxter is immediately initiating a protective allocation of the products listed on the reverse of this letter.

- Allocations will be 125% of your average monthly purchases directly from Baxter during the March thru August 2017 period.
- The allocations will be made available in four equal weekly amounts.
- Any amounts ordered that exceed your allocation will be held for further review and approved for release, if supply permits.

We regret any disruption to your daily operations and appreciate your patience as we reestablish our supply pipeline. For clinical questions regarding our portfolio of frozen pre-mixed drugs, please contact Baxter's Medical Information at 1-800-422-2751. For order-related and other questions, please contact Baxter's Center for Service at 1-888-229-0001. To establish new service for frozen premix products, please contact your local Baxter sales representative.

Again, we appreciate your patience and support as we work through this difficult situation together.

Regards,

Dennis A. Vaughn  
Senior Director, Customer Integration  
U.S. Hospital Products  
Baxter Healthcare Corporation
